Experienced tech leaders for your AI journey.

AI Support PDX is led by experienced technology and business leaders from the Vital Enterprises family (including VTM and Novus Labs). We've spent decades helping companies adopt new technologies, and we've been working with AI-enabled products for years. Now we're helping Portland-area businesses and nonprofits use AI to save time, win more work, and protect customer data — without needing a technical team.

Why AI, why now?

- Your customers expect faster responses and more personalized service.
- Your team is busy; AI can help them handle more work without burning out.
- AI has moved beyond the lab. 2026 is the year it becomes standard equipment for organizations that use it wisely.

What we do

- Map your current workflows and find high-ROI AI opportunities
- Refresh your website and web presence with AI-assisted content and SEO/AEO insights
- Build practical automations: scheduling, intake forms, report generation, and more
- Create private, secure AI assistants on your data — on-prem or in the cloud
- Train your team to use AI safely and confidently

Free December 2025 AI Readiness Consultation

Book a free 60–90 minute session and you'll receive:

- A quick pre-call questionnaire to understand how your organization runs
- A live strategy session focused on your specific workflows
- A 1-page AI Opportunities Snapshot (3–5 top ideas with rough ROI)
- Recommendations on whether on-prem, secure cloud, or simple tools fit you best
- A simple action plan for Q1 2026 ("first 30–90 days")

Available for Portland-area businesses and nonprofits that book before December 31, 2025.

Ongoing support (2026 packages)

AI Essentials – from $500/month

- Quarterly strategy & "What's new in AI" briefing
- Website & web presence review
